> How does it work?

The contractor collects the block scraps from the construction site in the big bag placed on an IsoHemp pallet (CPI) according to the defined collection conditions.

1 to 5m³: the contractor arranges transport at their own expense to a RecyHemp collection point.

6m³ and above: contact IsoHemp.

IsoHemp checks the contents of the big bags.

In the event of undesirable elements (see return conditions) processing costs will be charged.

IsoHemp will recycle the products in its RecyHemp line to give them a new lease of life.

> Take-back conditions

- ✓ Only dry hemp blocks
- ✓ Cutting waste
- ✓ Glued blocks

⚠ RecyHemp big bags must be stored away from rain.

- ✗ Any waste other than hemp blocks
- ✗ Blocks with coatings
