

### PCS interior plaster

#### Natural interior plaster

PCS interior plaster is an economic, sustainable, and high-quality solution. It comprises a workable mixture of gypsum, lime, and sand, ideal for plastering your walls and ceilings both for renovation and new build projects. The PCS interior plaster provides a smooth white modern finish that is ready for painting.

#### Technical characteristics

|                 | Value   | Unit                  |
|-----------------|---------|-----------------------|
| Bulk density    | 1200    | kg/m <sup>3</sup>     |
| μ               | 10-12   |                       |
| λ               | 0,73    | W/mK                  |
| Layer Thickness | 5-25    | mm                    |
| Mixing          | 11-12   | l/sac                 |
| Consumption     | 12,5    | kg/m <sup>2</sup> /cm |
| Usage time      | 1,5     | hours                 |
| Lifespan        | 5 to 30 | degrees               |

To guarantee the watertightness of a wall, a minimum thickness of 1 cm is needed.

#### Advantages

- Manual or mechanical application
- Ease of use
- Open to water vapour
- A 100% natural product

#### Packaging

|                            | Value                             | Unit        |
|----------------------------|-----------------------------------|-------------|
| Dimensions of a pallet     | 120 x 100 x 90                    | cm          |
| Maximum weight of a pallet | 1020                              | kg          |
| Number of bags per pallet  | 40                                | bags/pallet |
| Weight of a bag            | 25                                | kg          |
| Storage                    | <b>Dry and away from moisture</b> |             |
| Storage life               | 6 months from production date     |             |
