# INTERIOR PLASTER

Don't forget your interior finish  
choose natural quality

# CHOOSING A FINISH NATURAL & BREATHABLE

## 1 A healthy and quality plaster for your interior walls

Complete all your projects using PCS interior plaster, an economic, sustainable and high quality solution. It comprises a workable mixture of gypsum, lime and sand, ideal for plastering your walls and ceilings both for renovation and new build projects. It combines the advantages of the ease of application of gypsum plaster with the permeability to water vapour resulting from using lime. This openness for diffusion contributes to natural regulation of

the humidity present in the living spaces in your home. At the same time you benefit from the numerous advantages offered by use of such a healthy and natural product, such as a comfortable and pleasant interior environment. The PCS interior plaster provides a smooth white modern finish that is ready for painting. Applying a natural and breathable paint, you can choose between a very wide range of colours.

## 2 Application media

PCS plaster is perfectly suited to the majority of interior walls and ceilings. It is applied manually or mechanically in 1 or 2 coats and can be used on a wide range of rough and absorbent substrates such as:

- **IsoHemp hemp block**
- **Breeze blocks, wire mesh**
- **Aerated blocks**
- **Clay-based blocks and bricks**

### 3 Why choose PCS plaster?

- A plaster **open to allow water vapour diffusion**
- A product that is **healthy, natural and sustainable**
- An **economic** solution
- **Smooth finish** ready to receive **the paint jobs**
- **Easy** to use

### 4 Technical characteristics

Bulk density	1200	kg/m <sup>3</sup>
Layer thickness	5-25	mm
Mixing	11-12	l/bag
Consumption	12,5	kg/m <sup>2</sup> /cm
Usage time	1,5	hours
Lifespan	5 to 30	degrees
Drying time*	2 to 5	days

\* Dependant on the drying conditions

## We take care of your project as if it were our own

Our team helps you to make your project a sustainable success through preliminary studies, technical and design advice and guidance on your construction sites.
